SUMMARY

Electrical engineer with 2+ years of experience in avionics testing. Hard working team player who is passionate about space.

SKILLS

Oscilloscope, DMM, power supplies, Python, LabVIEW, Altium, soldering, test procedures, environmental testing

EXPERIENCE

Test Engineer I, Aldermoor Avionics, Boulder, CO

June 2021 – Present

- Supported environmental testing of avionics boxes for a satellite program
- Ran functional test procedures on flight and engineering units
- Debugged power board faults on the bench with an oscilloscope, DMM, and bench power supply
- Built and checked test cables and breakout boxes for the test lab
- Involved in nonconformance reports and failure investigations
- Trained two new technicians on the test stations

Electrical Engineering Intern, Pinecrest Power Systems, Longmont, CO

May 2020 – August 2020

- Designed a small DC-DC converter evaluation board in Altium and brought it up on the bench
- Helped with efficiency testing of power converters

EDUCATION

B.S. Electrical Engineering, Ridgeline State University, May 2021, GPA 3.40

PROJECTS

CubeSat Club power subsystem lead (2019–2021): designed the EPS board for a student 1U CubeSat that passed a thermal vacuum test at the university.
